

Vacancy Industrial Engineer with experience in data centers

Job description

Industrial Engineer with experience in data centers

- You are responsible for the daily organisation of the various data centres.
- You are responsible for:
 - Technical supervision of the installation (emergency power supply, cooling, monitoring, etc...)
 - Periodical testing of the technical infrastructure
 - Patching customer lines and keeping databases up-to-date
 - Co-management of the security and access control installations.
- You will, together with your colleagues, be responsible for installing new customer racks, their placing and connection with electrical and data cables.
- You will maintain and strengthen the relationship with the clientele in a professional, skilled and committed manner with your friendly and customer-oriented attitude.
- You enjoy working as an engineer in the field but you are also capable of working on projects based in an office.
- You are able to perform upgrades and first line interventions on the technical installations.
- You follow up the work performed by maintenance companies.
- You will be able to manage the data centre independently after an introductory period.

Profile

- You have several years of experience of maintenance of operations critical installations (preferably data centres).
- You are an ambitious Industrial Electromechanical Engineer with experience of electrical installations, cooling technologies and relevant maintenance work.
- You are Dutch- or French-speaking and you are able to express yourself well in French or Dutch respectively. Knowledge of English is an advantage.

- You have mastered one or more technical aspects of HVAC, electricity, power generators, UPS installations, data cabling and access control.
- You have distinguished yourself as a practical problem solver who keeps an eye on technological developments.
- You enjoy working in an entrepreneurial business environment within a varied and technical context where customer service and technical optimisation prevails.
- You enjoy working in a small team.
- You are flexible and willing to learn.
- You are stress-tolerant in critical situations.
- You are proactive and have a hands-on mentality.
- You have a driver's licence category B.
- You live preferably no more than 45 minutes from Diegem or you are prepared to move here.

Offer

- A fascinating, instructive and varied job in a flexible work environment in which initiative and responsibility is highly regarded.
- An opportunity to continue to learn, to develop your experience and to grow further.
- An expansive company with a leading reputation thanks to its continuous investments in innovative projects.
- Contract type :
Permanent full time employment, fixed salary, on-call bonus, mobile phone.

Employment Venue

- LCL, Kouterveldstraat 13, 1831 Diegem and a second location in Antwerp.
